Importing References from PubMed into RefWorks

Step #1

Select the articles you wish to import into RefWorks.

Step #2

Click on "Summary," then select the "MEDLINE" format.
Step #3

Select and copy all of the text in the MEDLINE format view.

Step #4

Log into Refworks, then proceed…

Click “References,” then “Import”
Step #5

Select "NLM PubMed" from the pull-down menu of Import Filter/Data Source.

Step #6

Click "From Text"
Step #7

Paste the material you copied from the Medline view of PubMed (previous screenshot) here.

Then click the Import button.
Importing References from Detailed View

**Step #1**
You can import references from this view, as well as from the detailed view for an article.
Click on the article title hyperlink.

**Step #2**
In the article view, click here, then select "Medline."
Exercise during pregnancy and gestational diabetes-related adverse effects: a randomized controlled trial.
